#### **DETAILED ACTION**

This Office Action is in response to Amendment filed August 8, 2006. Claims 1-9, 20 are presented for further examination.

### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-9, 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Klug et al. (hereinafter "Klug", US 6,823,327 B1).

As per claim 1, Klug discloses an information processing apparatus terminal device, capable of transmitting information comprising:

- receiving means receiving a request signal transmitted from the terminal device (column 2, lines 7-10, 37-41);
- user identifier generating means for generating identifier corresponding to request signal (column 2, lines 13-15, 41-45);
- Generation source identifier storage means storing a generation source identifier identifying a source of where the user identifier is generated (column 2, lines 13-15, 41-45);

Art Unit: 2157

- Wherein the generation source identifier is allocated form an external apparatus (column 9, lines 45-67)
- User transmitting means for transmitting the user identifier and the generation source identifier to the terminal device (column 2, lines 7-10, 37-41, column 11, lines 8-13, 43-50);
- Said receiving means, user identifier generating means, generation source identifier storage means, and transmitting means being included in a single device (column 4, lines 20-45);
- Said steps of receiving, generating, and transmitting being performed by a single device (column 4, lines 20-45).

As per claim 2, Klug discloses the information processing apparatus according claim 1, wherein the receiving means receives the request signal requesting the information processing apparatus to issue a user password identifying a user operating the terminal device and to issue an introduction password indicating the generation source of the user password (column 2, lines 13-31).

As per claim 3, Klug discloses the information processing apparatus according claim 2, wherein the receiving means receives individual information of the user operating the terminal device (column 1, lines 47-60).

Art Unit: 2157

As per claim 4, Klug discloses the information processing apparatus according to claim 3, wherein the receiving means receives request signal requesting issue of the user password and the introduction password that are used for accessing homepage information contained within an other information processing apparatus, specifies the homepage information the information processing apparatus that introduces the homepage information of the other information processing apparatus (column 2, lines 5-25, column 4, lines 24-33, column 5, lines 1-7, 18-25).

As per claim 5, Klug discloses the information processing apparatus according to claim 3, further comprising individual information storage means for storing the received individual information (column 5, lines 14-17, 29-31, 35-38).

As per claim 6, Klug discloses the information processing apparatus according to claim 5, wherein the user identifier generating means generates a user password corresponding to the received individual information, and transfers the generated user password to the individual information storage means that stores the transferred user password correspondingly to the individual information (column 2, lines 7-10, 37-41, column 11, lines 8-13, 43-50).

As per claim 7, Klug discloses the information processing apparatus according claim 1, wherein the generation source identifier storage means stores the generation source identifier identifying homepage information (column 5, lines 14-17, 29-31, 35-38).

Art Unit: 2157

As per claim 8, Klug discloses the information processing apparatus according to claim 7, wherein the generation service identifier storage means stores an introduction password as the generation source identifier identifying the homepage information (.column 5, lines 14-17, 29-31, 35-38).

As per claim 9, Klug discloses the information processing apparatus according to claim 1, wherein the user identifier and the generation source identifier are used when the terminal device accesses information contained within an other information processing apparatus, and the transmitting means transmits the user identifier and the generation source identifier to the other information processing apparatus (column 2, lines 5-25, column 4, lines 24-33, column 5, lines 1-7, 18-25).

As per claim 20, Klug discloses an information processing method comprising the steps of:

- receiving a request transmitted from a terminal device (column 2, lines 7-10, 37-41);
- generating a user identifier corresponding to the request (column 2, lines 13-15, 41-45);
- Transmitting the generated user identifier and a generation source identifier to the terminal device, wherein said generation source identifier is allocated from an external apparatus and stored in an information processing apparatus and identifies

Art Unit: 2157

a source where the user identifier is generated (column 2, lines 7-10, 37-41, column 9, lines 45-67, column 11, lines 8-13, 43-50).

### Response to Arguments

## The Office notes the following arguments:

(a) Klug fails to disclose Applicant's invention as presently recited in claims 1 and 20.

## In response to Applicant's arguments:

(a) Applicant's argument filed has been fully considered but is not persuasive.

Klug discloses the operations of receiving, generating, and transmitting being performed within a single device...a client node having access to the World Wide Web (WWW) (column 4, lines 20-40). Therefore, these step are included in a single device.

#### Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2157

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Barbara N. Burgess whose telephone number is (571) 272-3996. The examiner can normally be reached on M-F (8:00am-4:00pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Ettinene can be reached on (571) 272-4001. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
